

## TOPIC: ROOTS AND SPROUTS IN THE RURAL LANDSCAPE

### 1. Root

The basic organ of the plant attaching and nourishing the plant is the root. The name of the root often appears in the names of the plants. The other parts of the plants in the soil are also used in the standard language. The main root and the fibrous root are to be mentioned.

### 2. Sprout

The sprout of the plant is the germ of the bud from which the sprout will be developed. It is the yearly branch of the plant uprising from the stem or the stem with the foliage growing from the roots

**A blooming sprout** with flowers, flower shaped.

**An underground shoot** grows in the soil.

**A runner** grows vertically on the ground.

### 3. Rural landscape

The rural landscape has the characteristics of a painting fascinating the viewer by being picturesque and colourful as well as pretty as a picture.
